THErapy REIMAGINED

Adaptive Training Centers:

People with disabilities are finding it increasingly difficult to schedule and receive regular therapies that improve and maintain their quality of life.

Adaptive Heroes is challenging the status quo and reimagining how these critical services are delivered.

We'll transform 45-foot-long motor coaches into mobile therapy gyms. These mobile gyms will have significant impact in the communities they serve by increasing the opportunities for therapy and building medical capacity.

Our Service Targets

- Underprivileged families who have members with IDD / PD
- Underserved (Rural and Frontier Communities) in Colorado
- All Persons with IDD and/or PD.
- Build Medical Capacity through training and mentoring new therapists.
- Collect and compile data to improve services and identify additional opportunities

Mobile Platform Benefits

- Increased access to early intervention and specific therapies in rural and frontier areas of Colorado.
- Self-sufficient and able to operate at any location.
- Medical capacity building through partnerships with local providers, colleges and universities.
- Relatively low startup costs
- Reduced operating costs allowing for long term sustainability.
- Widespread community engagement and education opportunities

Medical Capacity Building:

- Partnerships with Universities and Colleges throughout the State.
- Creates a "pipeline" of new providers.
- Introduces new providers to rural areas in Colorado.
- Relationship development with providers to allow Adaptive Heroes the opportunity to "backstop" communities with high client to provider ratios.
- Data collection to provide lawmakers and advocacy organizations with real-time health care metrics.
